

PRODUCTION

ITEQ Vietnam always invests in sustainable and reliable machines, because for quality products you need quality machines. Quality, capacity and efficiency are key factors for us. We offer one of the most modern machine parks in Vietnam and keep investing in new technologies like; CNC Laser cutting, CNC bending, etc.

Your OEM partner

We go beyond (sheet) metal processing and offer a complete solution for OEM partners. We focus on more complex products and process materials like stainless steel, steel and aluminium. From CNC laser cutting, punching and bending till powder coating, silk screen printing and assembling. We are the ideal extension of your production by offering sustainable solutions for the production of housings, mono parts and assemblies. The factory offers customised solutions for the European, American and ASEAN regions.

ISO9001 & CSR

All production steps and processes are stabilized which is supported by our ISO 9001:2008 accredited by TÜV Rheinland. We find it important that everyone interacts safe and pleasant with each other in the same environment. Corporate Social Responsibility (CSR) we hold seriously and implemented wherever possible.

ERP & Shopfloor control

We follow the European production and safety standards and guide every production step with a completely integrated ERP system. This in combination with our Shopfloor control software assures traceability and control over every step in the production process.

Outsourcing

Due to our reliable network we offer use partners for outsourcing machining and a wide variety of surface treatments.
